

Sewer Line

General Information

A permit is required for the installation or repair of a building sewer.

A building sewer is a pipe that is connected to a sanitary building drain beginning outside a wall of a building and that conducts sewage to a public sewer or a private sewage disposal system.

- Building sewers shall be a minimum of 12 inches below grade and shall be of an approved material. Cleanouts shall be installed in accordance with city requirements.
- All materials used in the installation or repair of a building sewer shall comply with the requirements of the currently adopted edition of the International Plumbing Code and the International Residential Code.

Submittal Requirements

Permits may be applied for in the Building Inspection Department at 128 N Dallas Ave. Wilmer TX. 75172.

Plan Review and Permit Fee

- Please allow two weeks for residential plan review from the time application is submitted.
- Refer to the City of Wilmer Master Fee Schedule

Required Inspections

The inspection request line number is (972) 441-4472. This is an automated line available 24 hours a day. Inspections requested before 4pm will be scheduled the next business day unless otherwise specified.
